

River of election doubt runs through Montana

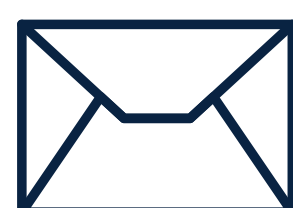

4,592 out of all 72,491 Missoula mail-in ballots ...

or **6.33% of the ballots** cast in Missoula in the 2020 General election **lacked matching signature envelopes**

Brad Tschida (HD 97) helped the ballot signature envelope review group **gain the access to conduct the review** in October of 2020

Tschida sent a letter to Montana Secretary of State Christi Jacobsen detailing his concerns about the review findings and calling for additional access to ballots

Estimated 46,000 excess votes statewide

According to Seth Keshel, MBA, analyst, and former Army Captain known for working for Gen. Michael Flynn:

"I estimate 46k excess votes statewide. If accurate, and counting ONLY excess Biden vote growth, Trump should have won this state about 61.6% to 35.6%, or 26.0% - in other words, a shellacking that tracks accurately with the progression from 2012 to 2016."

- Gallatin – 7,000
- Cascade – 3,000
- Flathead – 5,000
- Missoula – 6,000**
- Yellowstone – 6,000
- Lewis and Clark – 3,000
